Pat,

I advised them of the same thing today when they requested the meeting. So, from the Corps perspective, this will be a meeting about all forms of mitigation; including avoidance and minimization. They are working on an alternatives analysis for construction methodology, we will share it as soon as we have it.

Jayson:

Thanks, although it seems that a mitigation discussion is a little pre-mature given that there has not been (as far as we have been informed) an analysis of avoidance and minimization of impacts, particularly with regard to seagrasses. Will TGTI be bringing that information to the meeting, and can we have their analysis prior to the meeting to discuss with our subject experts in seagrasses?

Pat

Subject: [EXTERNAL] Texas Gulf Terminals Project Mitigation

Hello,

The Corpus Christi Regulatory Field Office is holding a joint agency meeting with the Texas Gulf Terminals Project applicants to discuss mitigation. For those who are not local or are not available to attend in person, a teleconference/webinar will be set up. Please let us know your availability by clicking the link and filling out the poll.
